

Vensafe Plus

Sell all your Vensafe products from the screen at the check-out.
This increases the service to your customers, and sales for your store

Vensafe Plus

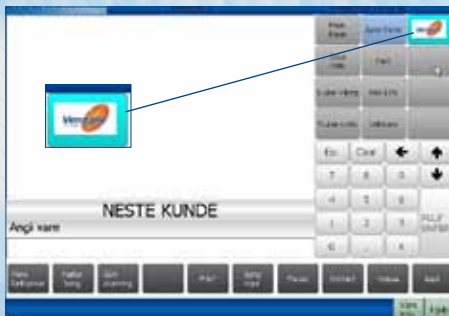

Vensafe Plus contributes to increased customer service and sales in store

Vensafe Plus are products that are sold from the check-out

- The customer can ask the cashier for a Vensafe product
- The cashier quickly selects the desired product for the customer using a shortcut/PLU list at the check out
- A product receipt is printed out after the check out receipt, which the customer takes to the dispenser to retrieve the product
- This saves time for customers who have forgotten to pick up a Vensafe product – they do not need to leave the queue to collect it

Vensafe Plus

Sell products from the check-out. This increases the service to your customers. This is an extra service for those who have forgotten their product

The customer and cashier do the following:

1. The customer tells the cashier which product he/she requires
2. The cashier finds the desired product using the Vensafe button on the screen

A Vensafe shortcut will be easily accessible on the overview screen in the check-out system. Press this to see the Vensafe products included in the system and select the product group

Select brand:

After selecting the product group, select the product brand

Select product:

All products corresponding to the selected product brand in the Vensafe system are shown. By clicking on the product that the customer requires, the product is added to the check-out item list together with the customer's other products. An activated product receipt is printed after the usual check out receipt
